

### THE X CONCEPT FOR OUR FILTERS

Protect the performance of your system with MYclean.

Quality and efficiency are fundamental for MP Filtri: this exclusive new filter element possesses polygon shape geometry and specific seal that ensures only original spare parts can be used ensuring correct operation and higher system reliability.

THE ANTI-STATIC FILTERS

## THE Z CONCEPT FOR OUR FILTERS

Zerospark® is a specialist solution designed to solve the problem of electrostatic discharge inside hydraulic filters. Caused by the electrical charge build-up due to the passage of oil through the filters, this can result in damage to filter elements, oils and circuit components. It can even cause fire hazards in environments where flammable materials are present.

## FMMX 050 ATEX series 6

with MYCLEAN + zerospark+

## HPX 050 Filter Element

- Protects the machine from improper use of non-original products.
- ▲ Safety of constant quality protection & reliability

With exclusive filter element you are sure that only MP Filtri filter elements can be used, ensuring the best cleaning level of the oil due to the use of originals filter elements.

The products identified as FMMX 050 are protected by:

- Italian Patent n° 102014902261205
- Oanadian Patent nº 2,937,258
- European Patent n° 3 124 092 B1
- US Patent n° 20170030384 A1

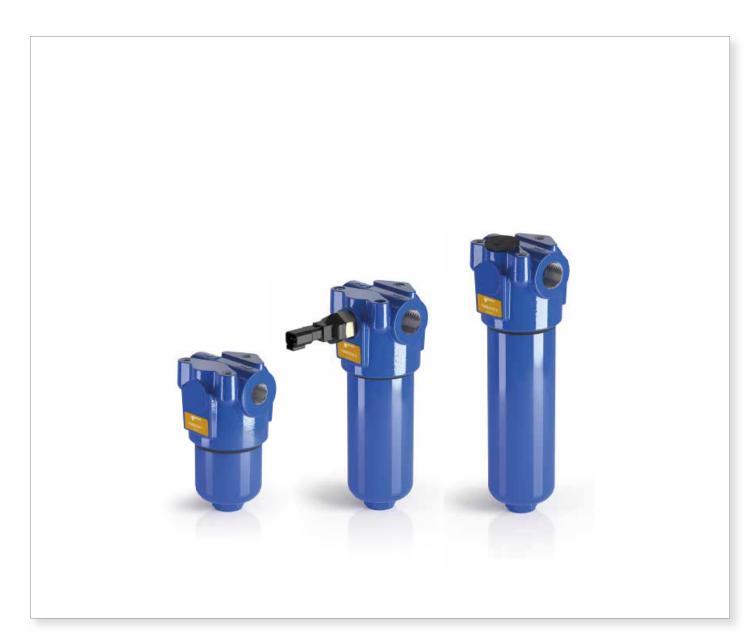

# FMMX 050 series

Maximum working pressure up to 42 MPa (420 bar) - Flow rate up to 154 l/min

## 1X ()50 general information

#### Description

## Filters for potentially explosive atmosphere

Maximum working pressure up to 42 MPa (420 bar) Flow rate up to 154 I/min

FMMX is a range of versatile high pressure filter for protection of sensitive components in high pressure hydraulic systems in the mobile machines. They are directly connected to the lines of the system through the hydraulic fittings.

#### **Available features:**

- Female threaded connections up to 1 1/4", for a maximum flow rate of 250 I/min
- Fine filtration rating, to get a good cleanliness level into the system
- Bypass valve, to relieve excessive pressure drop across the filter media
- Low collapse filter element with external support "N", for filter element protection against the back pressure caused by the check valve in filters provided with the bypass valve
- Visual, electrical and electronic differential clogging indicators
- MYclean interface connection for the filter element, to protect the product against non-original spare parts

#### **Common applications:**

- Agricultural machines
- Mobile machines

#### Filter with:

NBR seal in configuration **zerospark** 

FPM seal in configuration

zerospark+°

#### Technical data

#### Filter housing materials

- Head: Painted cast iron, black RAL 9005
- Housing: Phosphatized steel
- Bypass valve: Steel

#### **Pressure**

- Test pressure: 63 MPa (630 bar)
- Burst pressure: 126 MPa (1260 bar)
- Pulse pressure fatigue test: 1 000 000 cycles with pressure from 0 to 42 MPa (420 bar)

#### **Bypass valve**

- Opening pressure 600 kPa (6 bar) ±10%
- Other opening pressures on request.

#### Δp element type

- Microfiber filter elements series N: 20 bar
- Wire mesh filter elements series N: 20 bar
- Fluid flow through the filter element from OUT to IN

#### Seals

- Standard NBR series A
- Optional FPM series V

#### **Connections**

In-line Inlet/Outlet

#### Note

FMMX filters are provided for vertical mounting

#### **Temperature**

Seals	Ambient Temperature	Max fluid Temperature	Temperature Class	Max surface temperature
NBR	-15 °C ÷ +80 °C	+80 °C	T6	T85 °C
	-15 °C ÷ +80 °C	+80 °C	T6	T85 °C
FPM	-15 °C ÷ +95 °C	+95 °C	T5	T100 °C
	-15 °C ÷ +110 °C	+110 °C	T4	T115 °C

#### Weights [kg] and volumes [dm3]

Filter series	Weights [kg]				Volumes [dm³]								
	Length						Length						
FMMX 050		3.11	3.48	3.90	4.36	5.54		0.34	0.48	0.63	0.81	1.23	

## GENERAL INFORMATION FMMX 050

### FILTER ASSEMBLY SIZING Flow rates [I/min]

		Filter element design - N Series							
Filter series	Length	A03	A06	A10	A16	A25	M25		
	1	42	43	79	82	106	147		
	2	52	57	85	96	121	149		
FMMX 050	3	66	69	97	106	130	150		
	4	83	89	113	115	134	152		
	5	107	110	130	134	141	154		

Maximum flow rate for a complete pressure filter with a pressure drop  $\Delta p = 1.5$  bar.

The reference fluid has a kinematic viscosity of 30 mm<sup>2</sup>/s (cSt) and a density of 0.86 kg/dm<sup>3</sup>.

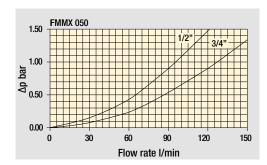

For different pressure drop or fluid viscosity we recommend to use our selection software available on www.mpfiltri.com.

You can also calculate the right size using the formulas present on the FILTER SIZING paragraph at the beginning of the full catalogue or at the beginning of the filter family brochure. Please, contact our Sales Department for further additional information.

### Hydraulic symbols

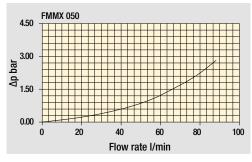

Filter series	Style S	Style B	Style T	Style D
FMMX 050	OUT D.I.	OUT D.I.	OUT TO THE PART OF	OUT TO THE PART OF

# Pressure drop Filter housings Δp pressure drop

Flow rate I/min

Filter housing with check valve

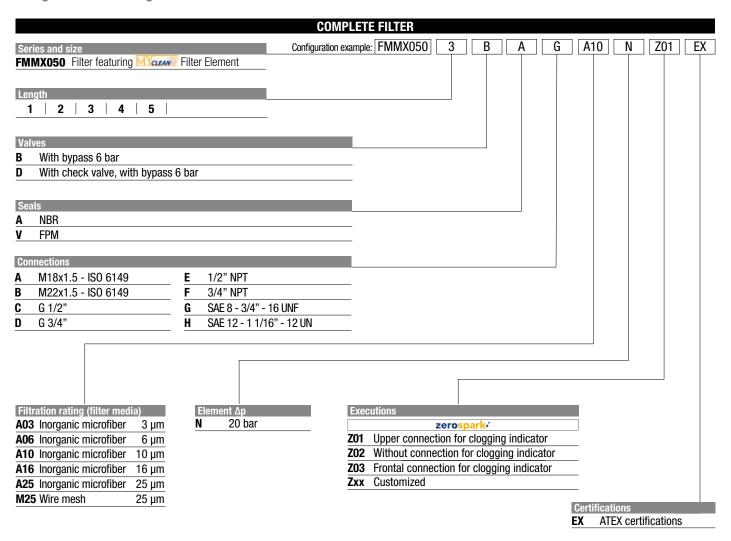

Valves

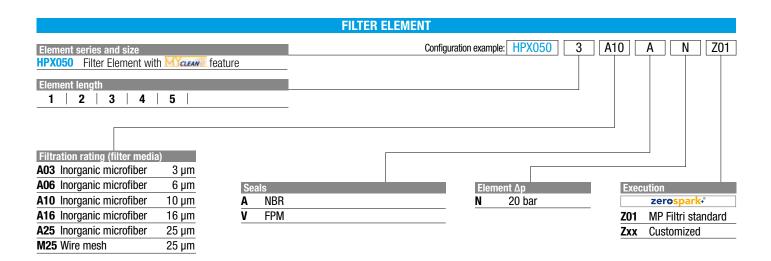

The curves are plotted using mineral oil with density of 0.86 kg/dm³ in compliance with ISO 3968.  $\Delta p$  varies proportionally with density.
